Build libraries for LIS - 'clock skew ...

[aude](#) 2 posts since

Apr 24, 2009 Hi LIS team,

I am trying to build the LIS executables but when I try to build the libraries I got warnings of this type:

gmake: Warning: File `Makefile' has modification time 7.2e+04 s in the future

gmake: `libw3.a' is up to date.

gmake: warning: Clock skew detected. Your build may be incomplete.

Any idea of how to fix this?

Can these be ignored?

Thanks

Hi,

The problem has been fixed by changing the date of the Makefile.

Thanks,

~a
